North Everett Transit Center/College Station

The North Everett Transit Center/College Station provides service to Everett Community College and improves access to local and regional transit services. The project features six bus bays, weather protected passenger shelters, efficient passenger loading areas, bus layover space and bicycle storage. The facility is served by Everett Transit and adds a convenient transfer point for routes that serve downtown Everett and Everett Station, where passengers can transfer to Community Transit buses, ST Express buses and Sounder commuter rail service.
